

## **BUSINESS RELATIONS TEAM VISION**

The BRT's vision is to work with and support Devon's adult social care providers and social care commissioners, in building a comprehensive social care service which puts the person at the centre and allows them to reach their personal care outcomes in inclusive and imaginative ways.

We aim to work in partnership, collaboratively, openly, and honestly with each other, respecting each others views. We aim to engage with our providers and encourage others, to involve the market at the earliest opportunity in order to build on opportunities for development.

As the business environment, both internally and externally becomes more challenging and complex, we will always endeavour to work in the best interests of the Authority, our valued social care providers and other partners.
