

Helping to prevent the scam calls getting through.

Devon & Somerset Trading Standards Service are putting money awarded from Proceeds of Crime Act prosecutions to good use by purchasing some Call blocker devices. The aim is to loan out these devices for a set period to qualifying consumers, that it is felt will benefit from having these call blocker units installed.

Trading standards officers are currently carrying out visits to known victims of scams across Devon and Somerset. As part of these visits officers will be assessing the viability of providing a call blocker.

The units are CPR V5000 which come with 5000 pre programmed numbers that are know to be used in scams. There is also the capacity to block an additional 1500 numbers.

CPR has also agreed to offer a discount to all consumers who are referred to them by Devon & Somerset Trading Standards at the end of the loan period.

If you feel you could benefit from a call blocker device you can visit the following websites;
