

# HEALTH AND WELLBEING OUTCOMES REPORT

## 14TH JANUARY 2016

### DEVON HEALTH AND WELLBEING BOARD

#### UPDATE ONLY VERSION

The Joint Health and Wellbeing Strategy has four priority areas and the selected indicators in this report align to these. Further to this, there are three types of indicators reflecting how the board will address the issue in question. These three types are:

**Challenge Indicators** – these cover areas where outcomes are poor, where inequalities are widening locally, or areas which are critical to future plans to improve health and wellbeing. The board will monitor these indicators and challenge current processes and practices in lead organisations in these areas.

**Monitoring ‘Watching Brief’ Indicators** – these cover areas where local outcomes are positive or where improvements have been made. The role of the board will be to monitor these indicators and intervene should outcomes deteriorate.

**Commissioning Improvement Indicators** – these are indicators for areas where joint working is required to improve outcomes and where the board will need to play a more active role in coordinating local commissioning.

Joint Health and Wellbeing Strategy indicators are set out in the grid on the next page, grouped against the four Joint Health and Wellbeing Strategy priorities and three indicator types. The outcomes framework they align to is identified within brackets. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each individual indicator report:

**South West Benchmarking** – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

**Local Authority District** – highlighting differences within Devon between local authority districts.

**Local Authority Comparator Group** – showing Devon’s position relative to the national family of peer authorities.

**Clinical Commissioning Group and Locality Comparison** – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

**Trend and Future Trajectory** – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

**Inequalities** – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

**\*UPDATED INDICATOR\***

Any queries on this report should be directed to the Devon Public Health Intelligence Team at [publichealthintelligence@devon.gov.uk](mailto:publichealthintelligence@devon.gov.uk)

## RAG Ratings

<b>Red</b>	<b>R</b>	Major cause for concern in Devon, benchmarking poor / off-target
<b>Amber</b>	<b>A</b>	Possible cause for concern in Devon, benchmarking average / target at risk
<b>Green</b>	<b>G</b>	No major cause for concern in Devon, benchmarking good / on-target

## Priority Area Summaries

**1. A Focus on Children and Families** - Child poverty levels continued to fall in 2013. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen sharply, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.

**2. Healthy Lifestyle Choices** - Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.

**3. Good Health and Wellbeing in Older Age** - Clostridium Difficile incidence aligns with South West and national rates. The gap between Devon and the South West and England for the detection of dementia, has narrowed significantly. Devon has relatively low levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Reablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.

**4. Strong and Supportive Communities** - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon than nationally. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is below the national average. Quality of life for carers is in line with the national average. Devon had lower levels of people with learning disabilities in stable and appropriate accommodation than the national average, but higher rates for people with mental health issues.

**Devon compared with the Local Authority Comparator Group (LACG) for Health and Wellbeing outcomes**

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Early Years Foundation Score

Period: 2015

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
 In 2015, 71.6% of children in Devon achieved a good level of development at school entry, which was significantly above the South West (67.2%), local authority comparator group (67.1%) and England (66.3%) rates. Within Devon this varied from 63.9% in Torrridge to 74.7% in the South Hams. Rates increased from 63.8% in 2013, and 67.8% in 2014.

**Equalities**  
 Significant and persistent differences exist between boys and girls in relation to levels of development at school entry. In 2015, 63.9% of males achieved a good level of development at school entry in Devon, compared to 79.6% for females. A lower proportion achieving a good level of development in the most deprived areas (63.3%) compared to the least deprived area (75.1%).

## INDICATOR SPECIFICATION

**Priority 1:** A Focus on Children and Families

**Indicator:** Early Years Foundation Score

**Period:** 2015

<b>Description</b>	Percentage of children achieving an Early Years Foundation Score indicating a good level of development at school entry
<b>Source</b>	Department for Education (South West Benchmarking, Trend and Local Authority Comparator Group). Babcock LDP (Local Authority District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annually, 2015-16 school year data due November 2016.
<b>Outcomes Framework</b>	Not applicable.
<b>Detailed Specification</b>	From 2013, children will be defined as having reached a 'Good Level of Development' at the end of the Early Years Foundation Stage if they achieve at least the expected level in the early learning goals in the prime areas of learning (personal, social and emotional development; physical development; and communication and language) and the early learning goals in the specific areas of mathematics and literacy.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Smoking at Time of Delivery

Period: 2014-15

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
 In the year 2014-15, 11.2% of mothers were smoking at time of delivery in Devon. This compares with 11.9% in the South West, and 11.4% in England. Nationally data are no longer reported on a local authority basis but on a CCG basis. The higher Devon rate in 2013-14 and 2014-15 is influenced by higher rates in Torbay and Plymouth. Rates have fallen over recent years.

**Equalities**  
 Whilst overall rates in Devon are the lowest in the South West, there is a strong inequalities gradient. Rates in the most deprived areas (25.7%) are almost five times higher than those in the least deprived areas (5.4%) in 2012-13. Smoking at time of delivery varies by age with younger mothers in their teens and twenties much more likely to smoke than mothers in their thirties and forties.

## INDICATOR SPECIFICATION

**Priority 1:** A Focus on Children and Families

**Indicator:** Smoking at Time of Delivery

**Period:** 2014-15

<b>Description</b>	Number of women who currently smoke at time of delivery per 100 maternities.
<b>Source</b>	The Health and Social Care Information Centre, Lifestyle Statistics
<b>Update Frequency</b>	Annually - typically three months in arrears (2015-16 data is due July 2016)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.03
<b>Detailed Specification</b>	Number of women known to smoke at time of delivery. Numerator counts for areas are based on all women resident within the PCT's boundary known to smoke. Denominator counts for areas are based on all women resident within the PCT's boundary who gave birth in the period. Data collected from Health and Social Care Information Centre's return on Smoking Status At Time of Delivery. This information has been collected using the Health and Social Care Information Centre's (HSCIC's) Omnibus system, a web based system set up to collect performance and other central returns directly from the NHS.
<b>Chart Notes South West</b>	Compares Primary Care Trust areas in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Rates are not currently available at local authority district level.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Teenage Conception Rate

Period: 2014 Q3 Rolling Year **\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
There were 201 conceptions in Devon between October 2013 and September 2014 for females aged under 18, with around half leading to a birth. The latest rate (16.3 per 1,000 females) was significantly below South West (19.4), local authority comparator group (20.4) and England (23.3) rates. The rate was the lowest in the local authority comparator group. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the differences are not statistically significant.

**Equalities**  
There is a very clear link between area deprivation and teenage conception, with higher rates in the most deprived areas both locally and nationally, although rates have fallen more rapidly in the most deprived wards in recent years. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 30 per annum), with less than 10 under 16 births per year.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Excess Weight in Four / Five Year Olds

Period: 2014-15 (School Year) **\*UPDATED INDICATOR\***

RAG Rating	
	Green
A	Amber
	Red

**Overview**  
This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 22.4% of pupils in Devon were recorded in the excess weight category, compared to 22.3% for the South West, 21.8% for the local authority comparator group, and 21.9% for England. Within Devon no areas were significantly above the national rate. Rates decreased on 2013-14 levels.

**Equalities**  
Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

### Indicator: Excess Weight in 10 / 11 Year Olds

Period: 2014-15 (School Year) **\*UPDATED INDICATOR\***

### RAG Rating

	Green
A	Amber
	Red

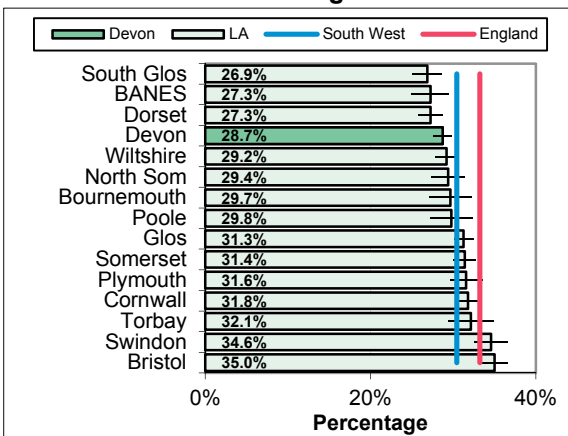

#### Overview

This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 28.7% of pupils in Devon were recorded in the excess weight category, which was below the South West (30.5%), local authority comparator group (31.0%), and England (33.2%) rates. The rates in the East Devon, North Devon, the South Hams and Teignbridge were significantly below the national rate. Rates decreased on 2013-14 levels.

#### Equalities

Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Adult Smoking Prevalence

Period: 2014

**\*UPDATED INDICATOR\***

#### RAG Rating

G	Green
	Amber
	Red

**Overview**  
The latest figures from the Integrated Household Survey suggest that 13.8% of the adult population in Devon smoke. This is below the South West (16.9%), local authority comparator group (16.8%) and England rate (18.0%). Smoking prevalence rates have dropped in Devon over recent years. Variations observed at a local authority district level were not statistically significant.

**Equalities**  
Smoking rates in Devon are higher in people working in routine and manual occupations (22.0%), although rates are falling. Levels of smoking are highest in the 16 to 29 age group, and are higher in males than females, although it should be noted that rates have been slower to fall in females. Adults smoking in the household greatly increases the likelihood of children taking up smoking at age 16.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Under 75 Mortality Rate - All Cancers

Period: 2012-14

**\*UPDATED INDICATOR\***

#### RAG Rating

G	Green
	Amber
	Red

**Overview** There are around 1,000 deaths annually due to cancer in under 75s, with an direct age standardised rate of 129.7 per 100,000 for 2012-14. The Devon rate was below the South West (130.5), local authority comparator group (132.1), and England (141.5) rates. Within the county, rates are highest in Exeter (144.3). Mortality rates by year have fallen from 157.2 in 2001-03. Mortality rates are higher in more deprived areas.

**Equalities** Mortality from cancer increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group. Mortality rates from cancer are around 20% higher in males than females in England. In terms of ethnicity, Cancer Reseach UK suggests higher mortality rates in white groups, although survival rates for breast cancer are lower in Asian and Black ethnic groups.

**Indicator:** Under 75 Mortality Rate - All Cancers

**Period:** 2012-14

<b>Description</b>	Direct age-standardised rate (DASR) of mortality from all cancers in persons less than 75 years per 100,000 population
<b>Source</b>	Office for National Statistics annual death extracts (South West Benchmarking, Local Authority District, Trend and Local Authority Comparator Group). Devon Public Health Intelligence Team (Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annual, 2015 data due autumn 2016
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 4.05i, NHS Outcomes Framework Indicator 1.4
<b>Detailed Specification</b>	Number of deaths from all cancers (classified by underlying cause of death recorded as ICD codes C00-C97) registered in the respective calendar years, in people aged under 75, aggregated into quinary age bands. Population for people aged under 75, aggregated into quinary age bands. Age specific rates are calculated and multiplied by the standard population for each age group and aggregated to give the age adjusted count of deaths for the area, and divided by the total standard population and multiplied by 100,000 to give the age standardised mortality rate for the area. The 2013 revision to the European Standard Population has been used for this
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Under 75 Mortality Rate - All Circulatory Diseases

Period: 2012-14

**\*UPDATED INDICATOR\***

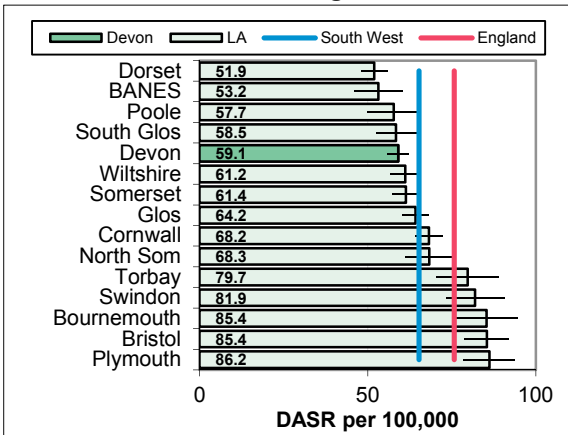

#### RAG Rating

G	Green
	Amber
	Red

**Overview**  
There are around 455 circulatory deaths annually in under 75s, with a direct age standardised rate of 59.1 per 100,000 for 2012-14. The Devon rate was below the South West (65.3), local authority comparator group (65.4) and England (75.7) rates. Within the county, rates are highest in Exeter, North Devon and Torridge. Mortality rates fell from 107.7 in 2001-03. In recent year the health inequality gap has narrowed considerably in Devon.

**Equalities**  
Mortality from circulatory disease increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group, and very few deaths in persons aged under 40. In Devon mortality rates are 2.5 times higher in males than females. The British Heart Foundation highlight that whilst risks did not vary considerably by ethnic group for females, white males were at higher risk.

Priority 4: Strong and Supportive Communities

Indicator: Suicide Rate

Period: 2012-14

**\*UPDATED INDICATOR\***

## RAG Rating

	Green
A	Amber
	Red

**Overview**  
 Around 80 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.4 per 100,000. This was above the South West (10.1), local authority comparator group (9.6) and England (8.9) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen, rates in Devon have typically remained around or slightly above the national rate.

**Equalities**  
 There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable in males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.
