

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## 26TH JULY 2016

### DEVON COUNTY COUNCIL

### UPDATES ONLY VERSION

The public health outcomes framework sets the context and 'strategic direction' for the new public health system with the vision of 'improving and protecting the nation's health while improving the health of the poorest fastest'. There are two overarching indicators concerning healthy life expectancy and life expectancy, and four domains with 66 further indicators, and around 130 sub-indicators. The domains are improving the wider determinants of health, health improvement, health protection, and healthcare public health. A prioritisation exercise was completed in September 2013 which looked at performance, human impact, and financial costs for these indicators and the prioritisation grid which lists out all indicators is available at [www.devonhealthandwellbeing.org.uk/jsna/performance/phof](http://www.devonhealthandwellbeing.org.uk/jsna/performance/phof)

Three types of indicators were identified from this exercise:

**Core Indicators** – these are indicators which have a large impact in terms of numbers affected and impact, or which are high spend areas for Public Health Devon. These indicators are covered by this report.

**Improvement Indicators** – these are indicators for areas where performance is poorer than expected or deteriorating and improvements to outcomes are required. These indicators are covered by this report.

**Monitoring Indicators** – these cover areas where local outcomes are positive and the scale, human impact and cost are not high. These indicators can be monitored through the Public Health Outcomes Tool: [www.phoutcomes.info](http://www.phoutcomes.info) and other sources.

There are six main analyses in each individual indicator report:

**South West Benchmarking** – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

**Local Authority District** – highlighting differences within Devon between local authority districts.

**Local Authority Comparator Group** – showing Devon's position relative to the national family of peer authorities

**Clinical Commissioning Group and Locality Comparison** – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

**Trend and Future Trajectory** – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

**Inequalities** – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

**\*UPDATED INDICATOR\***

Any queries on this report should be directed to the Devon Public Health Intelligence Team at [publichealthintelligence@devon.gov.uk](mailto:publichealthintelligence@devon.gov.uk)

# PUBLIC HEALTH DEVON OUTCOMES REPORT

Priority 1. Improving the Wider Determinants of Health

Indicator 1.10 Killed and Seriously Injured (KSI) on roads

Period: 2013-15

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
 985 people were killed or seriously injured on Devon's roads between 2013 and 2015, an average of 328 per year, with an average of just over six cases per week. The KSI rate in Devon (42.9 per 100,000) was significantly above the South West (38.6) and England (38.5) rates, and below the local authority comparator group rate (45.0). Within Devon rates were highest in West Devon (67.4) and lowest in Exeter (25.0). Rates have increased in Devon in recent years.

**Equalities**  
 Males are more likely to be killed or seriously injured than females. The likelihood is also greater in younger adults (16 to 24), and reduces through adult life with the lowest rates in over 65s. An analysis by rurality and deprivation reveals that more deprived rural areas have higher KSI rates (122.1) than less deprived areas (80.5), which the inverse is true in urban areas (more deprived 22.2, less deprived 25.9).

## PUBLIC HEALTH DEVON OUTCOMES REPORT INDICATOR SPECIFICATION

**Domain 1.** Improving the Wider Determinants of Health  
**Indicator 1.10** Killed and Seriously Injured (KSI) on roads  
**Period:** 2013-15

<b>Description</b>	Number of people reported killed or seriously injured on the roads, all ages, per 100,000 resident population.
<b>Source</b>	Department for Transport
<b>Update Frequency</b>	Annually, next update due summer 2017
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 1.10
<b>Detailed Specification</b>	Numerator was The number of people of all ages reported killed or seriously injured on the roads in the three year period. Denominator was 2011 Census based mid-year resident population estimate for the year 2012 multiplied by three. Crude rate per 100,000 population. The number of events observed over the three year period was divided by the mid-period population multiplied by 3, and the resulting rate multiplied by 100,000.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas according 2010 Indices of Deprivation (Index of Multiple Deprivation) and 2004 Urban Rural Classification groupings.

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## Priority 1. Improving the Wider Determinants of Health

### Indicator 1.11 Domestic Violence

Period: 2014-15

**\*UPDATED INDICATOR\***

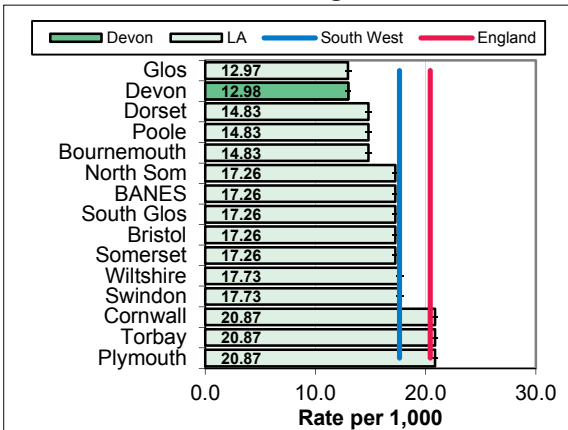

#### RAG Rating

	Green
A	Amber
	Red

**Overview**  
Domestic Violence incidents recorded by police are reported by Police Force through the Public Health Outcomes Framework. However, Devon breakdowns are possible through local sources and have been added. Devon has a rate of 12.98 per 1,000, below the South West (17.63), comparator group (17.23) and England (20.42) rates. Within Devon rates are highest in Exeter (16.73). Local trend information, including provisional figures for 2015-16 highlight recent decreases.

**Equalities**  
Domestic violence is more common in females with 7.3% women and 5.0% of men having been a victim of domestic abuse past year and 31.0% of women and 17.8% of men have been victims at some point since the age of 16 (British Crime Survey). Younger persons (18 to 29) are more likely to report domestic violence. Incident rates also tend to be higher in more deprived areas.

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## Priority 1. Improving the Wider Determinants of Health

### Indicator 1.17 Fuel Poverty

Period: 2014

**\*UPDATED INDICATOR\***

#### RAG Rating

	Green
A	Amber
	Red

**Overview** Over one in eight households in Devon are in fuel poverty (12.95%), which is above the South West (12.16%), local authority comparator group (10.26%), and England (10.56%) rates. Within Devon the highest levels of fuel poverty were seen in West Devon (15.16%) and the lowest were seen in East Devon (11.26%). Levels of fuel poverty increased between 2011 and 2014 in Devon but fell or remained stable in many other areas of the country.

**Equalities** Fuel poverty is more prevalent in groups with low household incomes, including pensioners, persons on benefits, and working families with below average incomes. The low wage economy, particularly in North and West Devon and higher living costs contribute to levels of fuel poverty locally. Fuel poverty is highest and has increased fastest in the most deprived areas.

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Domain 1.** Improving the Wider Determinants of Health  
**Indicator 1.17** Fuel Poverty  
**Period:** 2014

<b>Description</b>	The percentage of households that experience fuel poverty based on the "Low income, high cost" methodology
<b>Source</b>	Department of Energy and Climate Change (DECC) <a href="https://www.gov.uk/government/publications/2012-sub-regional-fuel-poverty-data-low-income-high-costs-indicator">https://www.gov.uk/government/publications/2012-sub-regional-fuel-poverty-data-low-income-high-costs-indicator</a>
<b>Update Frequency</b>	Annually, around 18 months in arrears
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 1.17
<b>Detailed Specification</b>	Under the "Low Income, High Cost" measure, households are considered to be fuel poor where: 1.They have required fuel costs that are above average (the national median level) 2.Were they to spend that amount, they would be left with a residual income below the official fuel poverty line. The key elements in determining whether a household is fuel poor or not are income, fuel prices, fuel consumption (which is dependent on the dwelling characteristics and the lifestyle of the household)
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## Domain 2. Health Improvement

### Indicator 2.04 Teenage Conception Rate

Period: Q1 2015 (rolling year) **\*UPDATED INDICATOR\***

RAG Rating	
G	Green
	Amber
	Red

**Overview** There were 209 conceptions in Devon between April 2014 and March 2015 for females aged under 18, with around half leading to a birth. The latest rate (17.1 per 1,000 females) was below South West (18.3), local authority comparator group (19.4) and England (22.3) rates. Rates have fallen significantly over recent years. The teenage conception rate in West Devon (6.5) is significantly below the Devon rate.

**Equalities** There is a very clear link between area deprivation and teenage conception, with higher rates in the most deprived areas both locally and nationally, although rates have fallen more rapidly in the most deprived wards in recent years. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 50 to 60 per annum), with less than 10 under 16 births per year.

## PUBLIC HEALTH DEVON OUTCOMES REPORT INDICATOR SPECIFICATION

**Domain 2.** Health Improvement  
**Indicator 2.04** Teenage Conception Rate  
**Period:** Q1 2015 (rolling year)

<b>Description</b>	Conceptions in women aged under 18 per 1,000 females aged 15-17.
<b>Source</b>	Office for National Statistics
<b>Update Frequency</b>	Quarterly - 16 months in arrears (Q2 2015 due October 2016)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.04
<b>Detailed Specification</b>	Number of pregnancies that occur to women aged under 18, that result in either one or more live or still births or a legal abortion under the Abortion Act 1967. Population aged 15 to 17 derived from Office for National Statistics Mid Year Population Estimates. Conceptions are divided by population and then multiplied by 1,000.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is based on 0.5 fall in rate per annum from 2009 baseline.
<b>Chart Notes Inequalities</b>	Compares rates in the wards with the highest teenage conception areas with the Devon average over time.

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## Domain 2. Health Improvement

### Indicator 2.22 Percentage Offered an NHS Health Check

Period: 2015-16 Q4 cumulative **\*UPDATED INDICATOR\***

#### RAG Rating

	Green
A	Amber
	Red

#### Overview

126,762 people in Devon have been offered a health check since April 2013. This represents 50.98% of the eligible population (248,638), which is above the South West (48.83%), and below the comparator group (58.21%) and England (56.44%) rates. Within Devon rates are highest in East Devon and the South Hams. Within local CCGs, rates are highest in the Moor-to-sea locality in South Devon.

#### Equalities

Whilst practices covering areas with below average deprivation have the lowest offered rates, the pattern by deprivation is mixed and variable.

## Domain 2. Health Improvement

### Indicator 2.22 Percentage Receiving an NHS Health Check

Period: 2015-16 Q4 cumulative **\*UPDATED INDICATOR\***

#### RAG Rating

	Green
A	Amber
	Red

#### Overview

63,105 people in Devon received a health check since April 2013. This represents 25.38% of the eligible population (248,638), which is above the South West (23.51%), but below the comparator group (27.67%) and England (27.42%) rates. Within Devon rates are highest in East Devon, the South Hams and Teignbridge. Within local CCGs, rates are highest in the Moor-to-Sea locality in South Devon.

#### Equalities

The pattern by deprivation is unclear, although the latest figures indicate that the highest proportions received were in less deprived areas.

Percentage of eligible population aged 40-74 receiving an NHS Health Check: the number of eligible people aged 40-74 who received an NHS Health Check is divided by the number of eligible people aged 40-74 and multiplied by 100.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on GP practice attributions. Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).

# PUBLIC HEALTH DEVON OUTCOMES REPORT

## Domain 2. Health Improvement

### Indicator 2.22 NHS Health Check Uptake Rate

Period: 2015-16 Q4 cumulative **\*UPDATED INDICATOR\***

#### RAG Rating

	Green
A	Amber
	Red

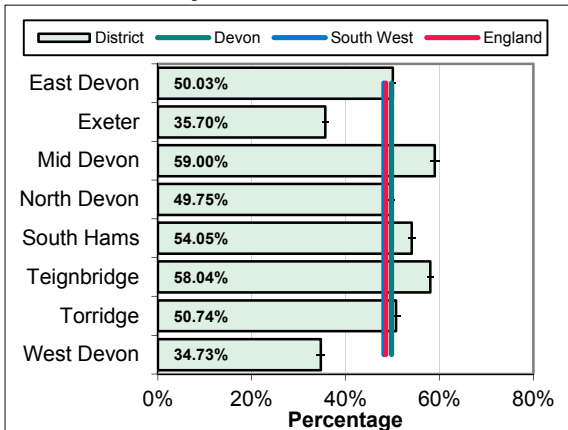

**Overview**  
The uptake rate for NHS health checks in Devon current stands at 49.78%, which is above the South West (48.16%), local authority comparator group (47.53%) and England (48.59%) rates. Within Devon rates were highest in Mid Devon and Teignbridge, and lowest in Exeter and West Devon. Within local CCGs, rates are highest in the Moor-to-Sea and Coastal localities in South Devon. The uptake rate has remained just below the 50% level in recent quarters.

**Equalities**  
The pattern by deprivation is mixed at present, with high rates in areas with below average levels of deprivation, which is more indicative of variations between different areas of Devon than the impact of deprivation on uptake rates.
