

# HEALTH AND WELLBEING OUTCOMES REPORT

## 10TH MARCH 2016

### DEVON HEALTH AND WELLBEING BOARD

#### FULL VERSION

The Joint Health and Wellbeing Strategy has four priority areas and the selected indicators in this report align to these. Further to this, there are three types of indicators reflecting how the board will address the issue in question. These three types are:

**Challenge Indicators** – these cover areas where outcomes are poor, where inequalities are widening locally, or areas which are critical to future plans to improve health and wellbeing. The board will monitor these indicators and challenge current processes and practices in lead organisations in these areas.

**Monitoring ‘Watching Brief’ Indicators** – these cover areas where local outcomes are positive or where improvements have been made. The role of the board will be to monitor these indicators and intervene should outcomes deteriorate.

**Commissioning Improvement Indicators** – these are indicators for areas where joint working is required to improve outcomes and where the board will need to play a more active role in coordinating local commissioning.

Joint Health and Wellbeing Strategy indicators are set out in the grid on the next page, grouped against the four Joint Health and Wellbeing Strategy priorities and three indicator types. The outcomes framework they align to is identified within brackets. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each individual indicator report:

**South West Benchmarking** – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

**Local Authority District** – highlighting differences within Devon between local authority districts.

**Local Authority Comparator Group** – showing Devon’s position relative to the national family of peer authorities.

**Clinical Commissioning Group and Locality Comparison** – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

**Trend and Future Trajectory** – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

**Inequalities** – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

**\*UPDATED INDICATOR\***

Any queries on this report should be directed to the Devon Public Health Intelligence Team at [publichealthintelligence@devon.gov.uk](mailto:publichealthintelligence@devon.gov.uk)

## RAG Ratings

<b>Red</b>	<b>R</b>	Major cause for concern in Devon, benchmarking poor / off-target
<b>Amber</b>	<b>A</b>	Possible cause for concern in Devon, benchmarking average / target at risk
<b>Green</b>	<b>G</b>	No major cause for concern in Devon, benchmarking good / on-target

## Priority Area Summaries

**1. A Focus on Children and Families** - Child poverty levels continued to fall in 2013. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen sharply, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.

**2. Healthy Lifestyle Choices** - Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.

**3. Good Health and Wellbeing in Older Age** - Clostridium Difficile incidence aligns with South West and national rates. The gap between Devon and the South West and England for the detection of dementia, has narrowed significantly. Devon has relatively low levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Reablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.

**4. Strong and Supportive Communities** - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon than nationally. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is below the national average. Quality of life for carers is in line with the national average. Devon had lower levels of people with learning disabilities in stable and appropriate accommodation than the national average, but higher rates for people with mental health issues.

**Devon compared with the Local Authority Comparator Group (LACG) for Health and Wellbeing outcomes**

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 1: A Focus on Children and Families

### Indicator: Children in Poverty

Period: 2013

### RAG Rating

	Green
A	Amber
	Red

**Overview** 15,215 children (12.4%) in Devon live in households dependent on benefits or tax credits, compared with 14.8% in the South West and 18.6% nationally. Child poverty rates in Devon fell between 1999 and 2008 and have dropped further from the South West average over time. Rates increased in 2009 and 2010 before falling gradually between 2011 and 2013. Rates at a district level range from 10.5% in East Devon to 15.6% in Torridge.

**Equalities** Considerable variation exists across Devon communities. Rates of child poverty are higher in younger families due to higher benefit claimant rates and lower incomes in persons in their 20s and 30s. Single parent households, particularly where headed by a female, are also more likely to experience economic poverty, as are children of disabled parents. There are no significant variations by ethnic group in Devon.

## INDICATOR SPECIFICATION

**Priority 1:** A Focus on Children and Families

**Indicator:** Children in Poverty

**Period:** 2013

<b>Description</b>	Percentage of children (aged 0 to 15) living in households dependent on benefits or tax credits.
<b>Source</b>	HM Revenue and Customs (Personal Tax Credits: Related Statistics - Child Poverty Statistics)
<b>Update Frequency</b>	Annually, around 20 months in arrears (2014 due Autumn 2016)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.01
<b>Detailed Specification</b>	Children living in families in receipt of Child Tax Credit (CTC) whose reported income is less than 60 per cent of the median income or are in receipt of income support (IS) or Income-Based Jobseeker's Allowance (JSA), as a proportion of the total number of children in the area.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Early Years Foundation Score

Period: 2015

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
 In 2015, 71.6% of children in Devon achieved a good level of development at school entry, which was significantly above the South West (67.2%), local authority comparator group (67.1%) and England (66.3%) rates. Within Devon this varied from 63.9% in Torridge to 74.7% in the South Hams. Rates increased from 63.8% in 2013, and 67.8% in 2014.

**Equalities**  
 Significant and persistent differences exist between boys and girls in relation to levels of development at school entry. In 2015, 63.9% of males achieved a good level of development at school entry in Devon, compared to 79.6% for females. A lower proportion achieving a good level of development in the most deprived areas (63.3%) compared to the least deprived area (75.1%).

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 1: A Focus on Children and Families

### Indicator: Smoking at Time of Delivery

Period: 2014-15

RAG Rating	
G	Green
	Amber
	Red

**Overview**  
 In the year 2014-15, 11.2% of mothers were smoking at time of delivery in Devon. This compares with 11.9% in the South West, and 11.4% in England. Nationally data are no longer reported on a local authority basis but on a CCG basis. The higher Devon rate in 2013-14 and 2014-15 is influenced by higher rates in Torbay and Plymouth. Rates have fallen over recent years.

**Equalities**  
 Whilst overall rates in Devon are the lowest in the South West, there is a strong inequalities gradient. Rates in the most deprived areas (25.7%) are almost five times higher than those in the least deprived areas (5.4%) in 2012-13. Smoking at time of delivery varies by age with younger mothers in their teens and twenties much more likely to smoke than mothers in their thirties and forties.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Priority 1:** A Focus on Children and Families

**Indicator:** Smoking at Time of Delivery

**Period:** 2014-15

<b>Description</b>	Number of women who currently smoke at time of delivery per 100 maternities.
<b>Source</b>	The Health and Social Care Information Centre, Lifestyle Statistics
<b>Update Frequency</b>	Annually - typically three months in arrears (2015-16 data is due July 2016)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.03
<b>Detailed Specification</b>	Number of women known to smoke at time of delivery. Numerator counts for areas are based on all women resident within the PCT's boundary known to smoke. Denominator counts for areas are based on all women resident within the PCT's boundary who gave birth in the period. Data collected from Health and Social Care Information Centre's return on Smoking Status At Time of Delivery. This information has been collected using the Health and Social Care Information Centre's (HSCIC's) Omnibus system, a web based system set up to collect performance and other central returns directly from the NHS.
<b>Chart Notes South West</b>	Compares Primary Care Trust areas in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Rates are not currently available at local authority district level.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Teenage Conception Rate

Period: 2014 Q3 Rolling Year

## RAG Rating

G	Green
	Amber
	Red

**Overview** There were 201 conceptions in Devon between October 2013 and September 2014 for females aged under 18, with around half leading to a birth. The latest rate (16.3 per 1,000 females) was significantly below South West (19.4), local authority comparator group (20.4) and England (23.3) rates. The rate was the lowest in the local authority comparator group. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the differences are not statistically significant.

**Equalities** There is a very clear link between area deprivation and teenage conception, with higher rates in the most deprived areas both locally and nationally, although rates have fallen more rapidly in the most deprived wards in recent years. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 30 per annum), with less than 10 under 16 births per year.

## Priority 1: A Focus on Children and Families

### Indicator: Hospital Admissions for Self-Harm, Aged 10 to 24

#### Period: 2013-14

### RAG Rating

	Green
	Amber
R	Red

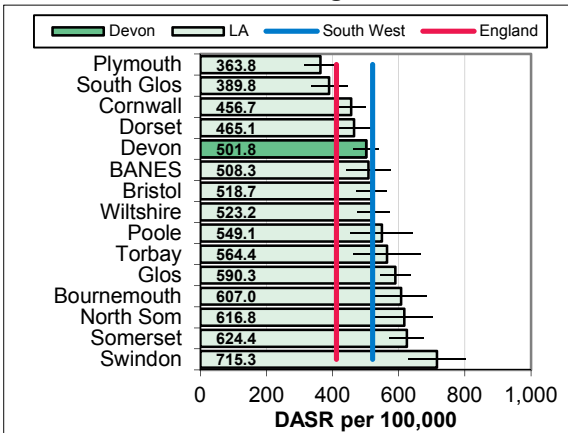

#### Overview

There were 653 hospital admissions for self-harm in persons aged 10 to 24 in Devon in 2013-14. The rate per 100,000 in Devon was 501.8, which is below the South West rate (520.8), but above the local authority comparator group (463.1) and England (412.1) rates. Admission rates increased from 376.6 in 2007-08 to 501.8 in 2013-14. Within Devon rates were highest in Exeter, and lowest in the South Hams.

#### Equalities

Rates of hospital admission for self-harm are three times higher in females than males and the gap has widened in recent years. Within the 10 to 24 age group admission rates were highest in those aged 15 to 19 (775.8). Admission rates also are higher in more deprived areas, with a rate of 1031.1 in the most deprived areas compared with 427.8 in the least deprived areas in 2013-14.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

### Priority 1: A Focus on Children and Families

**Indicator:** Hospital Admissions for Self-Harm, Aged 10 to 24

**Period:** 2013-14

<b>Description</b>	Direct Age Standardised Rate of finished admission episodes for self-harm per 100,000 population aged 10 to 24 years
<b>Source</b>	Source: CHIMAT Child Health Profiles <a href="http://www.chimat.org.uk/profiles">http://www.chimat.org.uk/profiles</a> Uses Hospital Episode Statistics from Health and Social Care Information Centre
<b>Update Frequency</b>	Annual, 2014-15 due 2016
<b>Outcomes Framework</b>	Local Proxy Indicator based on CHIMAT Child Health Profiles. Full Indicator will appear as: Public Health Outcomes Framework Indicator 2.10 when finalised.
<b>Detailed Specification</b>	Numerator is number of finished admission episodes in children aged between 10 and 24 years where the main recorded cause is between 'X60' and 'X84' (Intentional self-harm). Population for people aged 10 to 24, aggregated into quinary age bands. Age specific rates are calculated and multiplied by the standard population for each age group and aggregated to give the age adjusted count of deaths for the area, and divided by the total standard population and multiplied by 100,000 to give the age standardised mortality rate for the area. The 2013 revision to the European Standard Population has been used.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate over time. South West region and England rates not available as historical information has been published for the indicator.
<b>Chart Notes Inequalities</b>	Compares rates within Devon by sex.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Proportion of Physically Active Adults

Period: 2014

#### RAG Rating

G	Green
	Amber
	Red

**Overview**  
60.3% of adults in Devon were physically active for at least 150 minutes per week in 2014. This is broadly in line with South West (59.4%), and comparator group (58.9%) and significantly above the national (57.0%) rates. The differences between the districts in Devon were not statistically significant. Levels of physical activity decreased slightly from 60.9% in 2013 to 60.3% in 2014.

**Equalities**  
Local breakdowns by deprivation or equality characteristics are not available. National results from the Active People survey highlight that physical activity rates are higher in less deprived areas and professional groups. Participation is also higher in males and younger age groups. There are no significant differences by ethnicity. Activity rates are significantly lower in people with limiting long-term health problems.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Excess Weight in Four / Five Year Olds

Period: 2014-15 (School Year)

### RAG Rating

	Green
A	Amber
	Red

**Overview**  
This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 22.4% of pupils in Devon were recorded in the excess weight category, compared to 22.3% for the South West, 21.8% for the local authority comparator group, and 21.9% for England. Within Devon no areas were significantly above the national rate. Rates decreased on 2013-14 levels.

**Equalities**  
Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Excess Weight in 10 / 11 Year Olds

#### Period: 2014-15 (School Year)

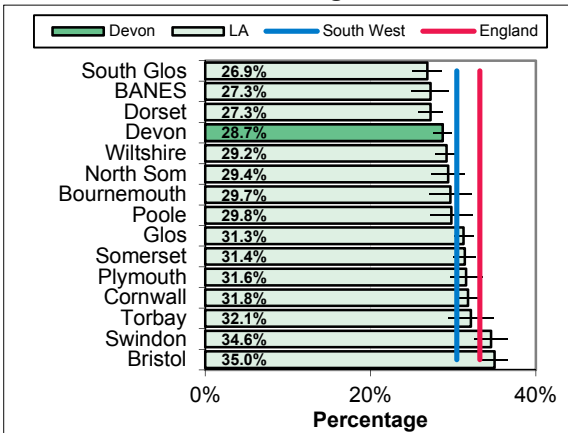

### RAG Rating

	Green
A	Amber
	Red

**Overview** This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 28.7% of pupils in Devon were recorded in the excess weight category, which was below the South West (30.5%), local authority comparator group (31.0%), and England (33.2%) rates. The rates in the East Devon, North Devon, the South Hams and Teignbridge were significantly below the national rate. Rates decreased on 2013-14 levels.

**Equalities** Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Alcohol-Related Admissions (narrow definition)

Period: 2015-16 Q2

**\*UPDATED INDICATOR\***

### RAG Rating

	Green
A	Amber
	Red

**Overview** Using the narrow definition from the Public Health Outcomes Framework, there were around 4,700 alcohol-related admissions to hospital for Devon residents between October 2014 to September 2015. The Direct Age Standardised Rate of admissions (587.9 per 100,000) is slightly below regional and national rates but slightly above the local authority comparator group rate. Rates within Devon are highest in Exeter, North Devon and Torridge. Rates are higher in more deprived areas.

**Equalities** Alcohol-Related Admission rates vary by age, with the highest rates in older age groups, reflecting the long-term effects of alcohol-use through life. Acute admissions (accidents and poisonings) are most common in young adults, mental health admissions in persons in their 40s and 50s, and admissions for chronic conditions in older age groups. Admission rates are higher for males than females.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Adult Smoking Prevalence

Period: 2014

#### RAG Rating

G	Green
	Amber
	Red

**Overview**  
The latest figures from the Integrated Household Survey suggest that 13.8% of the adult population in Devon smoke. This is below the South West (16.9%), local authority comparator group (16.8%) and England rate (18.0%). Smoking prevalence rates have dropped in Devon over recent years. Variations observed at a local authority district level were not statistically significant.

**Equalities**  
Smoking rates in Devon are higher in people working in routine and manual occupations (22.0%), although rates are falling. Levels of smoking are highest in the 16 to 29 age group, and are higher in males than females, although it should be noted that rates have been slower to fall in females. Adults smoking in the household greatly increases the likelihood of children taking up smoking at age 16.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Under 75 Mortality Rate - All Cancers

Period: 2012-14

#### RAG Rating

G	Green
	Amber
	Red

**Overview** There are around 1,000 deaths annually due to cancer in under 75s, with an direct age standardised rate of 129.7 per 100,000 for 2012-14. The Devon rate was below the South West (130.5), local authority comparator group (132.1), and England (141.5) rates. Within the county, rates are highest in Exeter (144.3). Mortality rates by year have fallen from 157.2 in 2001-03. Mortality rates are higher in more deprived areas.

**Equalities** Mortality from cancer increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group. Mortality rates from cancer are around 20% higher in males than females in England. In terms of ethnicity, Cancer Reseach UK suggests higher mortality rates in white groups, although survival rates for breast cancer are lower in Asian and Black ethnic groups.

## Priority 2: Healthy Lifestyle Choices

### Indicator: Under 75 Mortality Rate - All Circulatory Diseases

Period: 2012-14

#### RAG Rating

G	Green
	Amber
	Red

**Overview** There are around 455 circulatory deaths annually in under 75s, with a direct age standardised rate of 59.1 per 100,000 for 2012-14. The Devon rate was below the South West (65.3), local authority comparator group (65.4) and England (75.7) rates. Within the county, rates are highest in Exeter, North Devon and Torridge. Mortality rates fell from 107.7 in 2001-03. In recent year the health inequality gap has narrowed considerably in Devon.

**Equalities** Mortality from circulatory disease increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group, and very few deaths in persons aged under 40. In Devon mortality rates are 2.5 times higher in males than females. The British Heart Foundation highlight that whilst risks did not vary considerably by ethnic group for females, white males were at higher risk.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

**Priority 3: Good Health and Wellbeing in Older Age**

**Indicator: Incidence of Clostridium Difficile**

**Period: 2014-15**

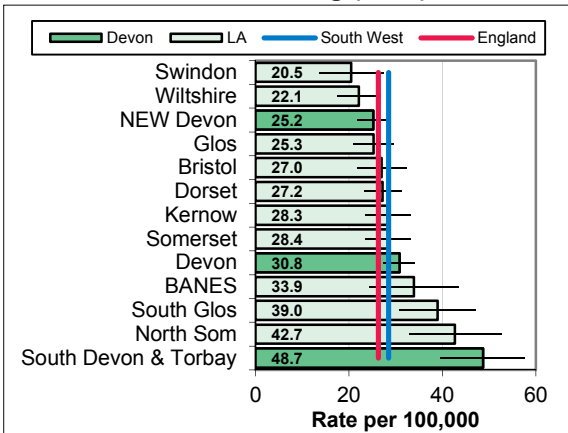

## RAG Rating

	Green
A	Amber
	Red

**Overview** There were 354 cases of Clostridium Difficile in 2014-15 in Devon, Plymouth and Torbay. The incidence rate per 100,000 in Devon (30.8) was not significantly different from the South West (28.5), local authority comparator group (27.4) and England (26.3) rates. Infection rates increased slightly on 2013-14 levels. Within Devon infection highs were higher in the South Devon and Torbay CCG (48.7) and lower in Northern Eastern and Western Devon CCG (25.2).

**Equalities** Incidence of Clostridium Difficile increases significantly with age, with a rate in 2012-13 of 9.7 per 100,000 in those aged 40 to 59 compared to 282.0 per 100,000 for those aged 80 and over. This is a consequence of higher hospital admissions in these age groups, a greater likelihood of living in a communal establishment (care homes) and poorer general health. Rates are also higher in females and in more

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Injuries Due to Falls

Period: 2014-15

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
 There were 3,587 admissions due to falls in 2014-15 in Devon for people aged 65 and over. The age standardised rate per 100,000 was 1763.7 in Devon, which is below the South West (1962.4), local authority comparator group (1903.5) and England (2124.6) rates. The rate in Devon is the second lowest in the South West. Within Devon rates were significantly lower in North Devon and Torridge. Rates in Devon are similar to 2013-14 levels..

**Equalities**  
 Rates are higher in females (2128.4) than males (1399.0). Age standardised admission rates have remained consistently higher in the most deprived deprivation quintile. Rates increase sharply with age with an age-specific rate of 484.2 for persons aged 65 to 69, compared with 6146.8 for those aged 85 and over.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Dementia Diagnosis Rate

Period: 2014-15

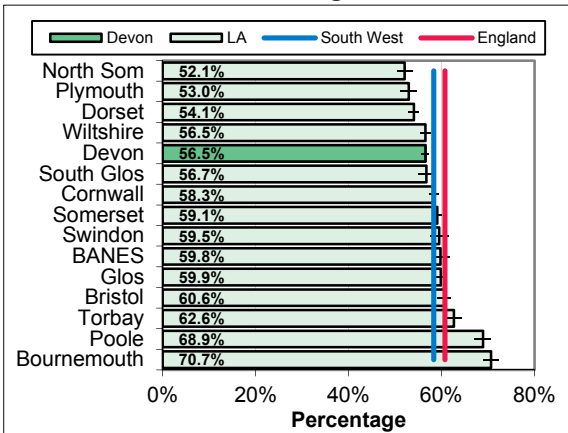

## RAG Rating

	Green
A	Amber
	Red

**Overview** In March 2015, 7,838 people in Devon were on a GP register for dementia, compared with an expected prevalence of 13,864, this is a diagnosis rate of 56.5%. The gap between Devon and the South West and England has narrowed considerably over the last two years. Diagnosis rates increased from 28.0% in 2006-07 and 44.9% in March 2014. The highest rates in Devon are seen in Exeter area (62.9%) and are particularly high in the Coastal locality covering Teignmouth and Dawlish (66.1%).

**Equalities** There are no significant differences in Devon based on area deprivation. Dementia prevalence rates are higher in females. This, coupled with longer life expectancy, means females with dementia outnumber males by more than two to one. Prevalence rates for dementia increase rapidly with age, with one in 1400 affected under the age of 65, compared with more than one in five in those aged 85 and over.

## INDICATOR SPECIFICATION

**Priority 3:** Good Health and Wellbeing in Older Age

**Indicator:** Dementia Diagnosis Rate

**Period:** 2014-15

<b>Description</b>	Number of persons recorded on a GP Dementia Disease Register as a % of those in the area predicted to have dementia (using age and sex based estimates)
<b>Source</b>	NHS Dementia Prevalence Calculator Primary Care Data Tool, Devon Public Health Intelligence Team (Local GP Practice Deprivation Quintiles)
<b>Update Frequency</b>	Quarterly, typically three to four weeks in arrears
<b>Outcomes Framework</b>	NHS Outcomes Framework Indicator 2.6i, Public Health Outcomes Framework Indicator 4.11 - not yet finalised as new dementia prevalence estimates are currently being devised to inform the frameworks.
<b>Detailed Specification</b>	Numerator is the number of people on a GP practice dementia disease register at the end of the given period and reported through the Quality and Outcomes Framework. Numbers predicted to have dementia apply local GP practice population in quinary age bands to age and sex specific dementia prevalence rates from the 2007 Dementia UK prevalence study. Rate divides the number on the QOF register by the predicted number with dementia to give the percentage diagnosed. GP practice numerators and denominators are aggregated to areas based on location of practice.
<b>Chart Notes South West</b>	Compares Former Primary Care Trusts in the South West Region. Error bar is 95% confidence interval.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Feel Supported to Manage Own Condition

Period: 2015-16 Q1-Q2

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
In Devon during early 2015-16, 67.8% of people with a long-term condition in the GP survey, felt they had enough support to manage their own condition. This is significantly higher than national (63.0%), South West (64.7%) and local authority comparator group (63.9%) rates. Rates were higher in NEW Devon CCG (67.1%) than South Devon and Torbay CCG (65.0%), and highest in the Exeter locality (71.6%).

**Equalities**  
There was no clear relationship between feeling supported to manage their own condition and deprivation. National results reveal the older age groups (85 and over, 69.2%) feel better supported than younger age groups (18 to 24, 58.2%), males (65.3%) feel better supported than females (62.0%), and minority ethnic groups feel less well supported.

**Priority 3:** Good Health and Wellbeing in Older Age

**Indicator:** Readmissions to Hospital Within 30 Days

**Period:** 2011-12

## RAG Rating

	Green
A	Amber
	Red

**Overview**  
In Devon in 2011-12, 10.29% of patients discharged after an emergency admission were readmitted within 30 days. This is significantly below the South West (10.93%), local authority comparator group (10.95%) and England (11.78%) rates. The rate in Devon was the third lowest in the South West and the lowest in the local authority comparator group. Exeter (11.72%) had a readmission rate above the South West and Devon rate. Readmission rates have increased over time, but slowed recently.

**Equalities**  
There is no local data currently available on the pattern by deprivation, age, sex and other factors, although reports are in development. National data highlights higher readmission rates in more deprived areas, ranging from 13.05% in the most deprived group to 10.53% in the least deprived group. Readmission rates are higher amongst males (12.13%, compared with 11.46% for females).

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 4: Strong and Supportive Communities

### Indicator: Suicide Rate

Period: 2012-14

### RAG Rating

	Green
A	Amber
	Red

**Overview**  
 Around 80 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.4 per 100,000. This was above the South West (10.1), local authority comparator group (9.6) and England (8.9) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen, rates in Devon have typically remained around or slightly above the national rate.

**Equalities**  
 There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable in males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Male Life Expectancy Gap

Period: 2012 to 2014

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

### Overview

The Slope Index of Inequality compares life expectancy in the most deprived and least deprived communities within an area's population, revealing the gap in life expectancy in years. For males in Devon the gap is 5.6 years which is significantly lower than the gaps for the South West (7.7), and England (9.2).

### Equalities

As the slope index of inequality compare the most and least deprived communities within an area's population, the smaller gap seen is partly a product of less severe social inequalities compared to other areas. The gap is more notable at the extremes with a 15 year gap in life expectancy at an electoral ward level. The life expectancy gap is much larger for males than females.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 4: Strong and Supportive Communities

Indicator: Self-Reported Wellbeing (low happiness score %)

Period: 2014-15

### RAG Rating

G	Green
	Amber
	Red

**Overview**  
 Low happiness score is one of four self-reported wellbeing measures in the Public Health Outcomes Framework, with others covering life satisfaction, feeling worthwhile and anxiety. Within Devon, 6.28% of the population had a low happiness score (ranked 0-4 on a scale of 10) on the index compared with 8.79% for the South West, 8.05% in the local authority comparator group and 8.95% in England overall. The percentage with a low happiness score is falling over time.

**Equalities**  
 No local information is available based on area deprivation or other characteristics. National findings highlight that self-reported wellbeing tends to be poorer in more deprived areas. There is a notable pattern by age with younger people and older people with higher levels of wellbeing than people in their 40s and 50s (known as the U shaped curve of happiness).

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Social Contentedness

Period: 2014-15

## RAG Rating

	Green
A	Amber
	Red

**Overview**  
42.8% of social care users surveyed in Devon in 2014-15 reported being satisfied with their social situation. This was significantly below South West (45.7%), local authority comparator group (45.4%) and England (44.8%) rates. Within Devon whilst there is some variation in responses at district level, smaller sample sizes mean the differences are not statistically significant. Rates decreased significantly on 2013-14 levels (47.5%).

**Equalities**  
Female social care users in Devon reported being more satisfied with their social situation than male social care users. Social care users with Learning Disabilities reported being the most satisfied with their level of social contact compared with other client groups.

## Priority 4: Strong and Supportive Communities

### Indicator: Carer Reported Quality of Life

Period: 2014-15

#### RAG Rating

G	Green
	Amber
	Red

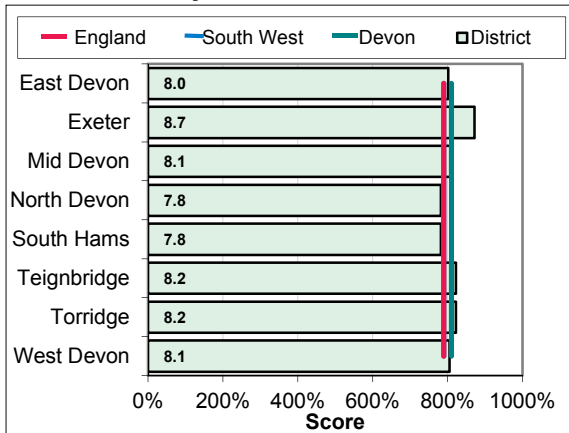

**Overview** This measure gives an overarching view of the quality of life of carers based on outcomes identified through research by the Personal Social Services Research Unit. This is the only current measure related to quality of life for carers available, and supports a number of the most important outcomes identified by carers themselves to which adult social care contributes. The carer reported quality of life in Devon is slightly above the South West, local authority comparator group and national average.

**Equalities** Not currently available at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Priority 4:** Strong and Supportive Communities

**Indicator:** Carer Reported Quality of Life

**Period:** 2014-15

<b>Description</b>	Carer Reported Quality of Life
<b>Source</b>	Carers Survey. National Adult Social Care Intelligence Service (SW Benchmarking, Trend and Comparator Group) DCC Management Information Team (Local Authority District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Bi-annually, around seven months in arrears after year end. 2016-17 due October 2017.
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 1D
<b>Detailed Specification</b>	This is a composite measure which combines individual responses to six questions measuring different outcomes related to overall quality of life. These outcomes are mapped to six domains (occupation, control, personal care, safety, social participation and encouragement and support). Responses to the questions indicate whether the carer has unmet needs in any of the six areas. The measure gives an overall score based on respondents' self-reported quality of life across the six questions. All six questions are given equal weight.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar not calculable.
<b>Chart Notes Local Authority</b>	Not yet available.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar not calculable.
<b>Chart Notes CCG/Locality</b>	Not yet available.
<b>Chart Notes Trend</b>	First year reported so not available.
<b>Chart Notes Inequalities</b>	Not yet available.

## Priority 4: Strong and Supportive Communities

### Indicator: Stable/Appropriate Accommodation (Learning Dis.)

Period: 2014-15

#### RAG Rating

	Green
A	Amber
	Red

**Overview**  
The nature of accommodation for people with learning disabilities has a strong impact on their safety and overall quality of life and the risk of social exclusion. In 2014-15 65.6% of adults with a learning disability in Devon (known to the council) were living in their own home or with their family, compared with 69.5% in the South West, 69.9% in the local authority comparator group and 73.3% nationally. Rates decreased on 2013-14 levels.

**Equalities**  
A higher proportion of younger adults (18-30) with a learning disability are in stable and suitable accommodation in Devon, compared to 31-64 year olds.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Priority 4:** Strong and Supportive Communities

**Indicator:** Stable/Appropriate Accommodation (Learning Dis.)

**Period:** 2014-15

<b>Description</b>	Proportion of adults with a learning disability who live in their own home or with their family.
<b>Source</b>	Adult Social Care Combined Activity Return. National Adult Social Care Intelligence Service (SW Benchmarking, Trend and Comparator Group) DCC Management Information Team (District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annually around seven months in arrears, 2015-16 due in October 2016.
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 1G, Public Health Outcomes Framework Indicator 1.6
<b>Detailed Specification</b>	The proportion of all adults with a learning disability who are known to the council, who are recorded as living in their own home or with their family. The definition of individuals 'known to the council' is currently restricted to those adults with a learning disability (with a primary client group of LD) who have been assessed or reviewed by the council during the year (irrespective of whether or not they receive a service) or who should have been reviewed but were not.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Rates cannot currently be calculated at a local level.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

**Priority 4: Strong and Supportive Communities**

**Indicator: Stable/Appropriate Accommodation (Mental Health)**

**Period: 2014-15**

## RAG Rating

G	Green
	Amber
	Red

**Overview** Stable and appropriate accommodation is closely linked to improving safety and reducing the risk of social exclusion. In 2014-15 60.9% of adults in contact with a secondary mental health service in Devon were in stable and suitable accommodation. This is higher than the South West (53.8%), local authority comparator group (55.2%), and England (59.7%) rates. Rates have increased on 2013-14 levels.

**Equalities** Not currently available at a local level.
